ENGO SOFT

AutoCAD® Structural Detailing course*

Who should attend ?

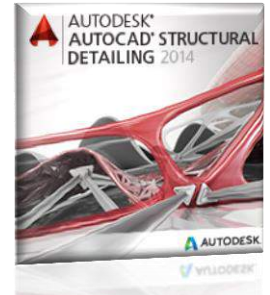

Structural Engineers, detailers and fabricators

Course Objectives

AutoCAD Structural Detailing: This course will assist users in starting an ASD project, building a "working catalog" of structural shapes, creating their structure through both beam and member placement, as well as connections. In addition, the creation of customized structural detail views, drawings, and BOM's. Course length is 2 days, and can be customized to better suit users' needs and current working demands.

Course outline

- Introduction to ASD Steel
- User Interface
- Work frames and wire modelling
- Integration with Revit Structure
- Profiles
- Connection macros
- Parametric Structures
- Plates, Drills, Bolts and Welds
- Machining
- Positioning
- Edition Editing
